

# INFANTS

## NTI Learning Activity 1

### Materials Needed:

Muffin Pan  
Balls or Other Toy that will fit in the pan  
Painters Tape

### What to Do:

Put ball or toys in each hole in the muffin tin.  
Place a piece of painters tape over each hole.  
Turn the muffin tin over to your infant.

### How does this activity benefit my child's development?

Fine Motor Skills—Your child must use his/her fingers and hands to get the tape off of the muffin tin.  
Problem Solving (Cognitive)—How am I going to get that toy?  
Sensory (Cognitive)—What is this sticky stuff? How am I going to get it off my hand?  
Language Development—Talk with your child during the activity. Although they may be too young to answer you it is not too early to ask questions and talk about and put words to the activities you are doing.
