

Holmes High School

SBDM Council Policy

**Alignment with State Standards
Required Policy**

To determine alignment with state standards, the Council each year will assign one or more groups to conduct a thorough review of the school's state assessment scores and shall use the information from that review to develop the Comprehensive School Improvement Plan.

To appraise the quality of our programs, the Council shall review periodically the observed results of each component of the Comprehensive School Improvement Plan. The review of test scores each year will help to identify priority needs for future attention.
